FOR IMMEDIATE RELEASE

Biala Wind Farm celebrates official completion of 31-turbine project

On Tuesday 11 October, Biala Wind Farm celebrated the official completion milestone of the 31-turbine project.

BJCE Australia acquired the wind farm in 2017 and construction commenced in August 2019. The project is now generating at full capacity, providing power to more than 46,000 homes on an average day of wind.

Weiwei Shi, Director, BJCE Australia said, "Today is a special day for the project. I would like to congratulate our site teams, Goldwind Australia, CATCON, Consolidated Power Projects and the local community on the completion of Biala Wind Farm."

"With the many challenges we faced through COVID-19, it is great to see this project finished. It reflects the hard work and dedication of everyone involved."

BJCE Australia hosted a small gathering onsite today with a number of local and special guests including:

- **The Hon Warwick Smith AO**, Chairman, Global Engagement Committee of the Business Council of Australia
- **Ms Pam Kensit**, Mayor of Upper Lachlan Shire
- **Mr Peter Walker**, Mayor of Goulburn Mulwaree Shire
- **Alex Waldron**, Director, Upper Lachlan Shire

The project consists of 31 wind turbines and guests were treated to a private site tour around the project before having lunch overlooking the turbines.

Mayor of Upper Lachlan Shire Council, Pam Kensit said, "It is wonderful to reach this milestone where the Biala Wind Farm is contributing actively to our clean energy exports for the Upper Lachlan Shire."

The completion of Biala Wind Farm adds to BJCE Australia's existing operational energy portfolio, with neighbouring Gullen Range Wind Farm operating since 2014 and Gullen Solar Farm since 2017.

Zhou Limin, Consul General of the People's Republic of China in Sydney said, "The successful story of BJCE Australia has also demonstrated the great potential for China-Australia cooperation in new energy.

China is committed to green, low-carbon and sustainable development and aims to reach carbon peak by 2030 and carbon neutrality by 2060, while Australia has legislated a national target to reduce carbon emissions by 43% below 2005 levels by 2030."

About Biala Wind Farm

Biala Wind Farm is a 31 turbine wind farm located approximately 6km south of Grabben Gullen on Grabben Gullen Road, 8km east of Biala and 14.5km south west of Crookwell in the Southern Tablelands of NSW. The wind farm is 100% owned by BJCE Australia.

About BJCE Australia

BJCE Australia [Beijing Jingneng Clean Energy (Australia) Holding Pty Ltd] is the Australian arm of [BJCE](#), one of Beijing's largest clean energy generation companies and a part of the Beijing Energy Holdings Group, which also includes BJEI Australia [Beijing Energy International (Australia) Holding Pty Ltd]. BJCE entered the Australian renewable energy market in 2014 by purchasing Gullen Range Wind Farm and setting up its Australian headquarters in Sydney, NSW. Together, BJCE Australia and BJEI Australia are targeting a 2GW clean energy portfolio by 2025.
